JIT PAUL

| **Deployment Engineer (DevOps Engineer**) | AWS, Jenkins (CI/CD), Terraform, Linux, Bitbucket, GitHub |

Phone: 7980062927 | Email: jeetpaul474@gmail.com | LinkedIn: https://www.linkedin.com/in/jit-paul/ |

Professional Summary

AWS-focused DevOps/Cloud Engineer (Deployment Engineer)**| 2.8 years' experience** in provisioning and automating cloud infrastructure (EC2, VPC, RDS, Lambda) with **Terraform and Jenkins**. Reduced deployment failures by **30%**, automated Security Group management, and maintained **99.9% uptime** for production systems. Experienced in **CI/CD optimization, cloud security best practices**, and supporting **daily deployments** across cross-functional teams.

Technical Skills

Cloud: AWS (EC2, S3, VPC, IAM, RDS, ELB, Lambda, CloudWatch, Route 53)
DevOps Tools: Jenkins (CI/CD), Terraform, Docker, GitHub, Bitbucket, Jira (ITSM)
Scripting: Python (basic), Groovy, YAML
Operating Systems: Linux/Ubuntu Servers
Soft Skills: Troubleshooting, Problem Solving, Collaboration, Communication

Professional Experience

1. Deployment Engineer (DevOps Engineer)

Hashcash Consultants, Kolkata **|** June 2024 – Present

- Provisioned and managed **AWS infrastructure (EC2, VPC, RDS, IAM, ELB, Route 53)** for production workloads, achieving **99.9% uptime** and high availability across multiple regions.
- Automated CI/CD pipelines using **Jenkins**, reducing deployment failures by **30%** and accelerating release cycles by **25%**.
- Developed **AWS Lambda-based automation** for dynamic Security Group access control, **eliminating 100% of manual VPN revocation tasks**, saving **~10 hours/week**.
- Implemented **Terraform** templates for consistent infrastructure provisioning and updates, cutting environment setup time by **40%**.
- Configured **CloudWatch monitoring and alerts**, proactively detecting **95% of critical system issues**, minimizing downtime and operational risk.
- Authored and maintained **runbooks, SOPs, and documentation**, standardizing processes and reducing new engineer on boarding time by **50%**.

Key Achievement:

- **Automated EC2 Security Group management** using **AWS Lambda, EventBridge, and IAM policies**, eliminating **100% of manual VPN revocation tasks**, improving security workflow efficiency by **~75%**, and reducing operational errors by **90%**.

- **Migrated enterprise email and workspace** from Google Workspace to Zoho Workspace, provisioning **over 70 users**, completing **IMAP data migration for 100% of mailboxes**, and configuring DNS records (MX/SPF/DKIM) with **zero downtime**.

2. Software Engineer

Wiz Digital Service, Kolkata | Oct 2022 – June 2023

- **Provided cloud infrastructure and application support** following **ITIL practices** via **Jira ITSM**, managing almost **100 tickets per month** with a **95% on-time resolution rate**.
- **Logged, tracked, and resolved L1 incidents** across server, network, and application layers, reducing **average incident resolution time by 30%**.
- **Configured CloudWatch monitoring and alerts**, enabling proactive detection of **90% of critical system issues** before impacting end users.
- **Supported AWS IAM governance and access reviews**, ensuring **100% compliance** with security policies and minimizing access-related risks.

3. Software Engineer Trainee

Amzur Technology Inc., WFH | June 2021 – Oct 2021

Education

- **B.Tech in Computer Science and Engineering** – Netaji Subhash Engineering College, Kolkata **(2016 – 2019)**

- **Diploma in Computer Science and Technology** – South Calcutta Polytechnic, Kolkata **(2013 – 2016)**
